

YCS Holdings Ltd.

Company Overview

YCS Holdings Ltd. is a diversified construction company delivering road building, earth moving, site preparation, underground work and other construction services in central and northwest BC.

We operate as a network of local companies who make operating decisions at the local level, enabling individual operations to remain agile and responsive to customer and local market needs. At the same time, each company has access to the resources and expertise from sister organizations and our Corporate Centers of Excellence.

Paving services

Our award-winning paving services range from smaller residential jobs to large industrial and government infrastructure projects.

Infrastructure construction

YCS Holdings Ltd. offers expertise in the construction of infrastructure in both urban areas and remote First Nations communities in northern BC. Services include underground sewer and water infrastructure, excavation and landscaping. Our specialty equipment operated by high-performance crews allows us to serve the particular needs of customers throughout the region.

Vertical integration

YCS Holdings Ltd. is a vertically integrated company, supplying all our own aggregates for concrete and asphalt production. We own and operate gravel pits and crush to specification, enabling us to control the supply and provide a top-quality product.

YCS HOLDINGS LTD.

YCS Holdings Ltd. is a diversified construction company delivering road building, earth moving, site preparation, underground work, and other construction services in central and northwest BC. We are a member of the Terus Construction Ltd. group of companies, a leader in roadbuilding and civil contracting, with subsidiaries operating throughout British Columbia and the Yukon Territory.
